

## Coding Temple Pre-Work for Python Class v2.0

Welcome to Coding Temple!

This pre-work should help you prepare for the course you have selected for the next 10 weeks. Over this time, we will not only go over the current trends in technology but also help you understand the industry, think like developers and solve complex problems.

### Pre-Work Python

<https://codingtemple.github.io/python-prework/> (Note: Using Python 3. Not Python 2!)

Please finish the python quiz assessment as well.

### Pre-Work HTML

- Quickly go through this HTML5 tutorial and check the “**Try it yourself**” example.  
<https://www.w3schools.com/html/default.asp>
- Please read through the chapters listed below of the book “HTML & CSS Design and build Websites”. Look at examples to get a better understanding of how to use the concepts. This is a reference book:
  - Chapter 2: Text
  - Chapter 3: Lists
  - Chapter 4: Links
  - Chapter 5: Images
  - Chapter 7: Forms

### Pre-Work CSS

Quickly go through this CSS Tutorial and check “**Try it yourself**” example.

<https://www.w3schools.com/css/default.asp>

### Create a portfolio website.

Once you have completed the **Pre-Work HTML** and **Pre-Work CSS** tasks, create a website using text, lists, include at least two links, two different images and a form. Use as many different CSS styles to help design your website. We would like you to create a website that tells us about you. You can include any text, or images on your website. We would like you to talk about yourself, your background, hobbies and why you want to become a web developer. Make it as elaborate as possible.

I will give some sample code later, but please work on your own design for now!

Next page is the LOOK of the sample site.
